

Bibliography

- [1] Adobe Systems Incorporated. *Adobe Type 1 Font Format*. Addison-Wesley, Reading, MA, USA, 1990. ISBN 0-201-57044-0.
The “black book” contains the specifications for Adobe’s Type 1 font format and describes how to create a Type 1 font program. The book explains the specifics of the Type 1 syntax (a subset of PostScript), including information on the structure of font programs, ways to specify computer outlines, and the contents of the various font dictionaries. It also covers encryption, subroutines, and hints. <http://partners.adobe.com/asn/developer/pdfs/tn/T1Format.pdf>
- [2] Adobe Systems Incorporated. “PostScript document structuring conventions specification (version 3.0)”. Technical Note 5001, 1992.
This technical note defines a standard set of document structuring conventions (DSC), which will help ensure that a PostScript document is device independent. DSC allows PostScript language programs to communicate their document structure and printing requirements to document managers in a way that does not affect the PostScript language page description.
http://partners.adobe.com/asn/developer/pdfs/tn/5001.DSC_Spec.pdf
- [3] Adobe Systems Incorporated. “Encapsulated PostScript file format specification (version 3.0)”. Technical Note 5002, 1992.
This technical note details the Encapsulated PostScript file (EPSF) format, a standard format for importing and exporting PostScript language files among applications in a variety of heterogeneous environments. The EPSF format is based on and conforms to the document structuring conventions (DSC) [2].
http://partners.adobe.com/asn/developer/pdfs/tn/5002.EPSF_Spec.pdf
- [4] Adobe Systems Incorporated. *PostScript Language Reference*. Addison-Wesley, Reading, MA, USA, 3rd edition, 1999. ISBN 0-201-37922-8.
The “red book” can be considered the definitive resource for all PostScript programmers. It contains the complete description of the PostScript language, including the latest Level 3 operators.
<http://www.adobe.com/products/postscript/pdfs/PLRM.pdf>

- [5] Adobe Systems Incorporated. PDF Reference, version 1.4. Addison-Wesley, Boston, MA, USA, 3rd edition, 2002. ISBN 0-201-75839-3.
 The specification of Adobe's Portable Document Format (PDF). The book introduces and explains all aspects of the PDF format, including its architecture and imaging model (allowing transparency and opacity for text, images, and graphics), the command syntax, the graphics operators, fonts and rendering, and the relation between PostScript and PDF. http://partners.adobe.com/asn/acrobat/docs/File_Format_Specifications/PDFReference.pdf
- [6] American Mathematical Society, Providence, Rhode Island. Instructions for Preparation of Papers and Monographs: *AMS-L^AT_EX*, 1999.
 This document contains instructions for authors preparing articles and books, using L^AT_EX, for publication with the American Mathematical Society (AMS) to match its publication style specifications: journals (*amsart*), proceedings volumes (*amsproc*), and monographs (*amsbook*).
<ftp://ftp.ams.org/pub/author-info/documentation/amslatex/instr-1.pdf>
- [7] American Mathematical Society, Providence, Rhode Island. Using the *amsthm* Package (Version 2.07), 2000.
 The *amsthm* package provides an enhanced version of L^AT_EX's *\newtheorem* command for defining theorem-like environments, recognizing *\theoremstyle* specifications and providing a *proof* environment. <ftp://ftp.ams.org/pub/tex/doc/amscls/amsthdoc.pdf>
- [8] American Mathematical Society, Providence, Rhode Island. User's Guide for the *amsmath* Package (Version 2.0), 2002.
 The *amsmath* package, developed by the American Mathematical Society, provides many additional features for mathematical typesetting. <http://www.ams.org/tex/amslatex.html>
- [9] American Mathematical Society, Providence, Rhode Island. User's Guide to AMSFonts Version 2.2d, 2002.
 This document describes AMSFonts, the American Mathematical Society's collection of fonts of symbols and several alphabets. <http://www.ams.org/tex/amsfonts.html>
- [10] J. André and Ph. Louarn. "Notes en bas de pages : comment les faire en L^AT_EX?" *Cahiers GUTenberg*, 12:57–70, 1991.
 Several special cases of using footnotes with L^AT_EX are discussed—for example, how to generate a footnote referring to information inside a *tabular* or *minipage* environment, and how to reference the same footnote more than once.
<http://www.gutenberg.eu.org/pub/GUTenberg/publicationsPDF/12-louarn.pdf>
- [11] Michael Barr. "A new diagram package", 2001.
 A rewrite of Michael Barr's original diagram package to act as a front end to Rose's *xypic* (see [57, Chapter 5]). It offers a general arrow-drawing function; various common diagram shapes, such as squares, triangles, cubes, and 3×3 diagrams; small 2-arrows that can be placed anywhere in a diagram; and access to all of *xypic*'s features. On CTAN at: macros.generic/diagrams/barr
- [12] Claudio Beccari and Apostolos Syropoulos. "New Greek fonts and the *greek* option of the *babel* package". *TUGboat*, 19(4):419–425, 1998.
 Describes a new complete set of Greek fonts and their use in connection with the *babel* *greek* extension.
<http://www.tug.org/TUGboat/Articles/tb19-4/tb61becc.pdf>
- [13] Nelson Beebe. "Bibliography prettyprinting and syntax checking". *TUGboat*, 14(4):395–419, 1993.
 This article describes three software tools for Bi_BT_EX support: a pretty-printer, syntax checker, and lexical analyzer for Bi_BT_EX files; collectively called *bibclean*.
<http://www.tug.org/TUGboat/Articles/tb14-4/tb41beebe.pdf>

- [14] Barbara Beeton. "Mathematical symbols and Cyrillic fonts ready for distribution". *TUGboat*, 6(2):59–63, 1985.
The announcement of the first general release by the American Mathematical Society of the Euler series fonts.
<http://www.tug.org/TUGboat/Articles/tb06-2/tb11beet.pdf>
- [15] Frank G. Bennett, Jr. "CAMEL: kicking over the bibliographic traces in BibTeX". *TUGboat*, 17(1):22–28, 1996.
The camel package provides a simple, logical citation interface for L^AT_EX that allows the bibliographic style of a document to be easily changed without major editing.
<http://www.tug.org/TUGboat/Articles/tb17-1/tb50benn.pdf>
- [16] Frank G. Bennett, Jr. "User's guide to the camel citator", 1997.
The documentation for version 1 of the camel package.
[On CTAN at: macros/latex/contrib/camel](#)
- [17] A. Berdnikov, O. Lapko, M. Kolodin, A. Janishevsky, and A. Burykin. "Cyrillic encodings for L^AT_EX2 ε multi-language documents". *TUGboat*, 19(4):403–416, 1998.
A description of four encodings designed to support Cyrillic writing systems for the multi-language mode of L^AT_EX2 ε . The "raw" X2 encoding is a Cyrillic glyph container that allows one to insert into L^AT_EX2 ε documents text fragments written in any of the languages using a modern Cyrillic writing scheme. The T2A, T2B, and T2C encodings are genuine L^AT_EX2 ε encodings that may be used in an multi-language setting together with other language encodings.
<http://www.tug.org/TUGboat/Articles/tb19-4/tb61berd.pdf>
- [18] Karl Berry. "Filenames for fonts". *TUGboat*, 11(4):517–520, 1990.
This article describes the consistent, rational scheme for font file names that was used for at least the next 15 years. Each name consists of up to eight characters (specifying the foundry, typeface name, weight, variant, expansion characteristics, and design size) that identify each font file in a unique way.
<http://www.tug.org/TUGboat/Articles/tb11-4/tb30berry.pdf>
- [19] Karl Berry. "Fontname: Filenames for T_EX fonts", 2003.
The on-line documentation of the latest version of "Fontname", a scheme for T_EX font file names; it explains some legal issues relating to fonts in a number of countries.
<http://www.tug.org/fontname/html/index.html>
- [20] Javier Bezos. "The accents package", 2000.
Miscellaneous tools for mathematical accents: to create faked accents from non-accent symbols, to group accents, and to place accents below glyphs.
[On CTAN at: macros/latex/contrib/bezos](#)
- [21] The *Bluebook*: A Uniform System of Citation. The Harvard Law Review Association, Cambridge, MA, 17th edition, 2000.
The *Bluebook* contains three major parts: part 1 details general standards of citation and style to be used in legal writing; part 2 presents specific rules of citation for cases, statutes, books, periodicals, foreign materials, and international materials; and part 3 consists of a series of tables showing, among other things, which authority to cite and how to abbreviate properly.
Can be ordered at: <http://www.legalbluebook.com>
- [22] Francis Borceux. "De la construction de diagrammes". *Cahiers GUTenberg*, 5:41–48, 1990.
The diagram macros typeset diagrams consisting of arrows of different types that join at corners that can contain mathematical expressions. The macros calculate automatically the length and position of each element. The user can specify a scaling factor for each diagram.
<http://www.gutenberg.eu.org/pub/GUTenberg/publicationsPDF/5-borceux.pdf>

- [23] Francis Borceux. “Diagram 3”, 1993.
 Commutative diagram package that uses \LaTeX picture mode.
[On CTAN at: macros/generic/diagrams/borceux](http://www.ctan.org/macros/generic/diagrams/borceux)
- [24] Thierry Bouche. “Diversity in math fonts”. *TUGboat*, 19(2):120–134, 1998.
 Issues raised when modifying \LaTeX fonts within math environments are examined. An attempt is made to suggest effective means of accessing a larger variety of font options, while avoiding typographic nonsense.
<http://www.tug.org/TUGboat/Articles/tb19-2/tb59bouc.pdf>
- [25] Johannes Braams. “Babel, a multilingual style-option system for use with \LaTeX ’s standard document styles”. *TUGboat*, 12(2):291–301, 1991.
 The babel package was originally a collection of document-style options to support different languages. An update was published in *TUGboat*, 14(1):60–62, April 1993.
<http://www.tug.org/TUGboat/Articles/tb12-2/tb32braa.pdf>
<http://www.tug.org/TUGboat/Articles/tb14-1/tb38braa.pdf>
- [26] Neil Bradley. *The XML Companion*. Addison-Wesley, Boston, MA, USA, 3rd edition, 2002. ISBN 0-201-77059-8.
 This book provides a description of XML features without assuming knowledge of HTML or SGML, covering also related standards such as Xpath, XML Schema, SAX, DOM, XSLT, Xlink, and Xpointer.
- [27] Peter Breitenlohner et al. “The e \TeX manual (version 2)”, 1998.
 The current manual for the e \TeX system, which extends the capabilities of \TeX while retaining compatibility.
[On CTAN at: systems/e-tex/v2/doc/etex_man.pdf](http://www.ctan.org/systems/e-tex/v2/doc/etex_man.pdf)
- [28] Robert Bringhurst. *The elements of typographic style*. Hartley & Marks Publishers, Point Roberts, WA, USA, and Vancouver, BC, Canada, 2nd edition, 1996. ISBN 0-88179-133-4 (hardcover), 0-88179-132-6 (paperback).
 A very well-written book on typography with a focus on the proper use of typefaces.
- [29] Judith Butcher. *Copy-editing: The Cambridge handbook for editors, authors and publishers*. Cambridge University Press, New York, 3rd edition, 1992. ISBN 0-521-40074-0.
 A reference guide for all those involved in the process of preparing typescripts and illustrations for printing and publication. The book covers all aspects of the editorial process, from the basics of how to mark a typescript for the designer and the typesetter, through the ground rules of house style and consistency, to how to read and correct proofs.
- [30] David Carlisle. “A \LaTeX tour, Part 1: The basic distribution”. *TUGboat*, 17(1):67–73, 1996.
 A “guided tour” around the files in the basic \TeX distribution. File names and paths relate to the file hierarchy of the CTAN archives.
<http://www.tug.org/TUGboat/Articles/tb17-1/tb50carl.pdf>
- [31] David Carlisle. “A \LaTeX tour, Part 2: The tools and graphics distributions”. *TUGboat*, 17(3):321–326, 1996.
 A “guided tour” around the “tools” and “graphics” packages. Note that *The Manual* [104] assumes that at least the graphics distribution is available with standard \TeX .
<http://www.tug.org/TUGboat/Articles/tb17-3/tb52carl.pdf>
- [32] David Carlisle. “A \LaTeX tour, Part 3: mfnfss, psnfss and babel”. *TUGboat*, 18(1):48–55, 1997.
 A “guided tour” through three more distributions that are part of the standard \TeX system. The mfnfss distribution provides \TeX support for some popular METAFONT-produced fonts

that do not otherwise have any L^AT_EX interface. The psnfss distribution consists of L^AT_EX packages giving access to PostScript fonts. The babel distribution provides L^AT_EX with multilingual capabilities.

Some proposals for a radically new syntax and software tools.
<http://www.tug.org/TUGboat/Articles/tb18-4/tb57rowl.pdf>
- [37] Pehong Chen and Michael A. Harrison. “Index preparation and processing”. *Software—Practice and Experience*, 19(9):897–915, 1988.
A description of the makeindex system.
- [38] The Chicago Manual of Style. University of Chicago Press, Chicago, IL, USA, 15th edition, 2003. ISBN 0-226-10403-6.
The standard U.S. publishing style reference for authors and editors.
- [39] Adrian F. Clark. “Practical halftoning with T_EX”. *TUGboat*, 12(1):157–165, 1991.
Reviews practical problems encountered when using T_EX for typesetting half-tone pictures and compares other techniques to include graphics material. Advantages and disadvantages of the various approaches are described and some attempts at producing color separations are discussed.
<http://www.tug.org/TUGboat/Articles/tb12-1/tb31clark.pdf>
- [40] Matthias Clasen and Ulrik Vieth. “Towards a new math font encoding for (I)A^T_EX”. *Cahiers GUTenberg*, 28–29:94–121, 1998.
A prototype implementation of 8-bit math font encodings for L^AT_EX.
<http://www.gutenberg.eu.org/pub/GUTenberg/publicationsPDF/28-29-clasen.pdf>
- [41] Carl Dair. Design with Type. University of Toronto Press, Toronto, Ontario, Canada, 1967. ISBN 0-8020-1426-7 (hardcover), 0-8020-6519-8 (paperback).
A good survey of traditional typography with many useful rules of thumb.

- [42] Michael Downes. “Breaking equations”. *TUGboat*, 18(3):182–194, 1997.
 TeX is not very good at displaying equations that must be broken into more than one line. The *breqn* package eliminates many of the most significant problems by supporting automatic line breaking of displayed equations.
<http://www.tug.org/TUGboat/Articles/tb18-3/tb56down.pdf>
- [43] Michael Downes. “The *amsrefs* L^AT_EX package and the *amsxport* B_BT_EX style”. *TUGboat*, 21(3):201–209, 2000.
 Bibliography entries using the *amsrefs* format provide a rich internal structure and high-level markup close to that traditionally found in B_BT_EX database files. On top of that, using *amsrefs* markup lets you specify the bibliography style completely in a L^AT_EX document class file.
<http://www.tug.org/TUGboat/Articles/tb21-3/tb68down.pdf>
- [44] Dudenredaktion, editor. *Duden, Rechtschreibung der deutschen Sprache*. Dudenverlag, Mannheim, 21st edition, 1996. ISBN 3-411-04011-4.
 The standard reference for the correct spelling of all words of contemporary German and for hyphenation rules, with examples and explanations for difficult cases, and a comparison of the old and new orthographic rules.
- [45] Victor Eijkhout. *T_EX by Topic*, A T_EXnician’s Reference. Addison-Wesley, Reading, MA, USA, 1991. ISBN 0-201-56882-9. Out of print. Available free of charge from the author in PDF format.
 A systematic reference manual for the experienced T_EX user. The book offers a comprehensive treatment of every aspect of T_EX, with detailed explanations of the mechanisms underlying T_EX’s working, as well as numerous examples of T_EX programming techniques.
<http://www.eijkhout.net/tbt>
- [46] Robin Fairbairns. “UK list of T_EX frequently asked questions on the Web”, 2003.
 This list of Frequently Asked Questions on T_EX was originated by the Committee of the U.K. T_EX Users’ Group; it has well over 300 entries and is regularly updated and expanded.
<http://www.tex.ac.uk/faq>
- [47] Laurence Finston. “Spindex—Indexing with special characters”. *TUGboat*, 18(4):255–273, 1997.
 Common Lisp indexing program and supporting T_EX macros for indexes that include non-Latin characters.
<http://www.tug.org/TUGboat/Articles/tb18-4/tb57fins.pdf>
- [48] Shinsaku Fujita and Nobuya Tanaka. “X^MT_EX (Version 2.00) as implementation of the X^MM notation and the X^MM markup language”. *TUGboat*, 21(1):7–14, 2000.
 A description of version 2 of the X^MT_EX system, which can be regarded as a linear notation system expressed in T_EX macros that corresponds to the IUPAC (International Union of Pure and Applied Chemistry) nomenclature. It provides a convenient method for drawing complicated structural formulas.
<http://www.tug.org/TUGboat/Articles/tb21-1/tb66fuji.pdf>
- [49] Shinsaku Fujita and Nobuya Tanaka. “Size reduction of chemical structural formulas in X^MT_EX (Version 3.00)”. *TUGboat*, 22(4):285–289, 2001.
 Further improvements to the X^MT_EX system, in particular in the area of size reduction of structural formulas.
<http://www.tug.org/TUGboat/Articles/tb22-4/tb72fuji.pdf>
- [50] Rei Fukui. “TIPA: A system for processing phonetic symbols in L^AT_EX”. *TUGboat*, 17(2):102–114, 1996.
 TIPA is a system for processing symbols of the International Phonetic Alphabet with L^AT_EX. It introduces a new encoding for phonetic symbols (T3), which includes all the symbols and diacritics found in the recent versions of IPA as well as some non-IPA symbols. It has full support

- for $\text{\LaTeX}2_{\varepsilon}$ and offers an easy input method in the IPA environment.
<http://www.tug.org/TUGboat/Articles/tb17-2/tb51rei.pdf>
- [51] Bernard Gaulle. “Comment peut-on personnaliser l’extension french de $\text{\LaTeX}?$ ” *Cahiers GUTenberg*, 28–29:143–157, 1998.
Describes how to personalize the french package.
<http://www.gutenberg.eu.org/pub/GUTenberg/publicationsPDF/28-29-gaulle.pdf>
- [52] Maarten Gelderman. “A short introduction to font characteristics”. *TUGboat*, 20(2):96–104, 1999.
This paper provides a description of the main aspects used to describe a font, its basic characteristics, elementary numerical dimensions to access properties of a typeface design, and the notion of “contrast”.
<http://www.tug.org/TUGboat/Articles/tb20-2/tb63geld.pdf>
- [53] Charles F. Goldfarb. The SGML Handbook. Oxford University Press, London, Oxford, New York, 1990. ISBN 0-19-853737-9.
The full text of the ISO SGML standard [68] copiously annotated by its author, and several tutorials.
- [54] Norbert Golluch. Kleinweich Büro auf Schlabberscheiben. Eichborn, Frankfurt, 1999.
Tecknisches Deutsch für Angefangen.
- [55] Michel Goossens, Frank Mittelbach, and Alexander Samarin. The \LaTeX Companion. Tools and Techniques for Computer Typesetting. Addison-Wesley, Reading, MA, USA, 1994. ISBN 0-201-54199-8.
The first edition of this book.
- [56] Michel Goossens and Sebastian Rahtz. The \LaTeX Web Companion: Integrating \TeX , HTML, and XML. Tools and Techniques for Computer Typesetting. Addison-Wesley Longman, Reading, MA, USA, 1999. ISBN 0-201-43311-7.
With Eitan M. Gurari, Ross Moore, and Robert S. Sutor.
This book teaches (scientific) authors how to publish on the web or other hypertext presentation systems, building on their experience with \TeX and taking into account their specific needs in fields such as mathematics, non-European languages, and algorithmic graphics. The book explains how to make full use of the Adobe Acrobat format from \LaTeX , convert legacy documents to HTML or XML, make use of math in web applications, use \LaTeX as a tool in preparing web pages, read and write simple XML/SGML, and produce high-quality printed pages from web-hosted XML or HTML pages using \TeX or PDF.
- [57] Michel Goossens, Sebastian Rahtz, and Frank Mittelbach. The \LaTeX Graphics Companion: Illustrating Documents with \TeX and PostScript. Tools and Techniques for Computer Typesetting. Addison-Wesley, Reading, MA, USA, 1997. ISBN 0-201-85469-4.
The book shows how to incorporate graphic files into a \LaTeX document, program technical diagrams using several different languages, produce color pictures, achieve special effects with fragments of embedded PostScript, and make high-quality music scores and game diagrams. It also contains detailed descriptions of important packages such as `xypic`, `pstricks`, and `MetaPost`, the standard \LaTeX color and graphics packages, PostScript fonts and how to use them in \LaTeX , and the `dvips` and `ghostscript` programs.
- [58] Michel Goossens and Vesa Sivunen. “ \LaTeX , SVG, Fonts”. *TUGboat*, 22(4):269–279, 2001.
A short overview of SVG and its advantages for portable graphics content, conversion of PostScript glyph outlines to SVG outlines, and the use of SVG glyphs in \TeX documents.
<http://www.tug.org/TUGboat/Articles/tb22-4/tb72goos.pdf>

- [59] Ronald L. Graham, Donald E. Knuth, and Oren Patashnik. Concrete Mathematics. Addison-Wesley, Reading, MA, USA, 2nd edition, 1994. ISBN 0-201-55802-5.
A mathematics textbook prepared with \TeX using the Concrete Roman typeface; see also [92].
- [60] George Grätzer. Math into \LaTeX . Birkhäuser and Springer-Verlag, Cambridge, MA, USA; Berlin, Germany/Basel, Switzerland, and Berlin, Germany/Heidelberg, Germany/London, UK/ etc., 3rd edition, 2000. ISBN 0-8176-4131-9, 3-7643-4131-9.
Provides a general introduction to \LaTeX as used to prepare mathematical books and articles. Covers AMS document classes and packages in addition to the basic \LaTeX offerings.
- [61] George D. Greenwade. “The Comprehensive \TeX Archive Network (CTAN)”. *TUGboat*, 14(3):342–351, 1993.
An outline of the conception, development, and early use of the CTAN archive, which makes all \TeX -related files available on the network.
<http://www.tug.org/TUGboat/Articles/tb14-3/tb40green.pdf>
- [62] Yannis Haralambous. “Typesetting old German: Fraktur, Schwabacher, Gotisch and initials”. *TUGboat*, 12(1):129–138, 1991.
Demonstrates the use of METAFONT to recreate faithful copies of old-style typefaces and explains the rules for typesetting using these types, with examples.
<http://www.tug.org/TUGboat/Articles/tb12-1/tb31hara.pdf>
- [63] Horace Hart. Hart’s Rules; For Compositors and Readers at the University Press, Oxford. Oxford University Press, London, Oxford, New York, 39th edition, 1991. ISBN 0-19-212983-X.
A widely used U.K. reference for authors and editors. With the *Oxford Dictionary for Writers and Editors* it presents the canonical house style of the Oxford University Press. See also [143].
- [64] Alan Hoenig. \TeX Unbound: \LaTeX and \TeX Strategies for Fonts, Graphics, & More. Oxford University Press, London, Oxford, New York, 1998. ISBN 0-19-509686-X (paperback), 0-19-509685-1 (hardcover).
The first part of this book provides a brief but comprehensive overview of \TeX , \LaTeX , METAFONT, and MetaPost, with particular emphasis on how everything fits together, how the production cycle works, and what kinds of files are involved. The second part is devoted to details of fonts and their use in \TeX . Of particular interest are 30 pages of examples showing how various combinations of well-known text typefaces might be used together with the few choices of math fonts currently available. The final part of the book discusses graphics applications—in particular, \TeX -friendly methods such as METAFONT and MetaPost, the pstricks package, PCTEX, and MFpic.
- [65] Berthold K. P. Horn. “The European Modern fonts”. *TUGboat*, 19(1):62–63, 1998.
The European Modern (EM) fonts are Type 1 fonts based on Computer Modern (CM) that have ready-made accented and composite characters, thus enabling \TeX hyphenation when using languages that use such characters.
<http://www.tug.org/TUGboat/Articles/tb19-1/tb58horn.pdf>
- [66] Jean-Michel Hufflen. “Typographie: les conventions, la tradition, les goûts,..., et \LaTeX ”. *Cahiers GUTenberg*, 35-36:169–214, 2000.
This article shows that learning typographic rules—even considering those for French and English together—is not all that difficult. It also teaches the basics of using the \LaTeX packages french (for French only) and babel (allowing a homogeneous treatment of most other languages).

- Finally, the author shows how to build a new multilingual document class and bibliography style.
<http://www.gutenberg.eu.org/pub/GUTenberg/publicationsPDF/35-hufflen.pdf>
- [67] “ISO/IEC 8859-1:1998 to ISO/IEC 8859-16:2001, Information technology—8-bit single-byte coded graphic character sets, Parts 1 to 16”. International Standard ISO/IEC 8859, ISO Geneva, 1998–2001.
A description of various 8-bit alphabetic character sets. Parts 1–4, 9, 10, and 13–16 correspond to 10 character sets needed to encode different groups of languages using the Latin alphabet, while part 5 corresponds to Cyrillic, part 6 to Arabic, part 7 to Greek, part 8 to Hebrew, and part 11 to Thai.
- [68] “ISO 8879:1986, Information Processing—Text and Office Systems—Standard Generalised Markup Language (SGML)”. International Standard ISO 8879, ISO Geneva, 1986.
The—not always easy to read—ISO standard describing the SGML language in full technical detail. An addendum was published in 1988 and two corrigenda in 1996 and 1999. See [53] for an annotated description.
- [69] “ISO/IEC 10646-1:2000, Information technology—Universal Multiple-Octet Coded Character Set (UCS)—Part 1: Architecture and Basic Multilingual Plane”. International Standard ISO 10646-1 (Edition 2), ISO Geneva, 2000.
This standard specifies the architecture of the Universal Multiple-Octet Coded Character Set (UCS). This 32-bit character encoding standard is for all practical purposes identical to the Unicode standard; see [165]. The layout of the Basic Multilingual Plane (plane 0 or BMP) is described in detail. An amendment in 2002 added mathematical symbols and other characters.
- [70] “ISO/IEC 10646-2:2001, Information technology—Universal Multiple-Octet Coded Character Set (UCS)—Part 2: Supplementary Planes”. International Standard ISO 10646-2, ISO Geneva, 2001.
Complementing [69], which describes plane 0 (BMP) of the UCS, the present standard details the layout of the supplementary planes; see also [165].
- [71] “ISO/IEC 14651:2001, Information technology—International string ordering and comparison—Method for comparing character strings and description of the common template tailorable ordering”. International Standard ISO/IEC 14651:2001, ISO Geneva, 2001.
- [72] Alan Jeffrey. “PostScript font support in L^AT_EX 2_E”. *TUGboat*, 15(3):263–268, 1994.
Describes the original psnfss distribution for using PostScript fonts with L^AT_EX.
<http://www.tug.org/TUGboat/Articles/tb15-3/tb44jeff.pdf>
- [73] Alan Jeffrey. “Tight setting with T_EX”. *TUGboat*, 16(1):78–80, 1995.
Describes some experiments with setting text matter in T_EX using Adobe Times, a very tightly spaced text font.

- [82] Donald E. Knuth. The T_EXbook, volume A of *Computers and Typesetting*. Addison-Wesley, Reading, MA, USA, 1986. ISBN 0-201-13447-0.
 The definitive user’s guide and complete reference manual for T_EX.
- [83] Donald E. Knuth. T_EX: The Program, volume B of *Computers and Typesetting*. Addison-Wesley, Reading, MA, USA, 1986. ISBN 0-201-13437-3.
 The complete source code for the T_EX program, typeset with several indices.
- [84] Donald E. Knuth. The METAFONTbook, volume C of *Computers and Typesetting*. Addison-Wesley, Reading, MA, USA, 1986. ISBN 0-201-13445-4 (hardcover), 0-201-13444-6 (paperback).
 The user’s guide and reference manual for METAFONT, the companion program to T_EX for designing fonts.

- [85] Donald E. Knuth. METAFONT: The Program, volume D of *Computers and Typesetting*. Addison-Wesley, Reading, MA, USA, 1986. ISBN 0-201-13438-1.
The complete source code listing of the METAFONT program.
- [86] Donald E. Knuth. Computer Modern Typefaces, volume E of *Computers and Typesetting*. Addison-Wesley, Reading, MA, USA, 1986. ISBN 0-201-13446-2.
More than 500 Greek and Roman letterforms, together with punctuation marks, numerals, and many mathematical symbols, are graphically depicted. The METAFONT code to generate each glyph is given and it is explained how, by changing the parameters in the METAFONT code, all characters in the Computer Modern family of typefaces can be obtained.
- [87] Donald E. Knuth. 3:16 Bible texts illuminated. A-R Editions, Inc., Madison, Wisconsin, 1990. ISBN 0-89579-252-4.
Analysis of Chapter 3 Verse 16 of each book of the Bible. Contains wonderful calligraphy.
- [88] Donald E. Knuth. The Art of Computer Programming, vols 1-3. Addison-Wesley, Reading, MA, USA, 1998.
A major work on algorithms and data structures for efficient programming.
- [89] Donald E. Knuth. Digital Typography. CSLI Publications, Stanford, CA, USA, 1999. ISBN 1-57586-011-2 (cloth), 1-57586-010-4 (paperback).
A collection of Knuth's writings on TeX and typography.
- [90] Donald E. Knuth. "Mathematical typography". In Knuth [89], pp. 19-65.
Based on a lecture he gave in 1978, Knuth makes the point that mathematics books and journals do not look as now beautiful as they did in the past. As this is mainly due to the fact that high-quality typesetting has become too expensive, he proposes to use mathematics itself to solve the problem. As a first step he sees the development of a method to unambiguously mark up the math elements in a document so that they can be easily handled by machines. The second step is to use mathematics to design the shapes of letters and symbols. The article goes into the details of these two approaches.
- [91] Donald E. Knuth. "Virtual fonts: More fun for grand wizards". In Knuth [89], pp. 247-262. Originally published in *TUGboat* 11(1):13-23, 1990.
An explanation of what virtual fonts are and why they are needed, plus technical details.

<http://www.tug.org/TUGboat/Articles/tb11-1/tb27knut.pdf>
- [92] Donald E. Knuth. "Typesetting concrete mathematics". In Knuth [89], pp. 367-378. Originally published in *TUGboat* 10(1):31-36, 1989.
Knuth explains how he prepared the textbook *Concrete Mathematics*. He states that he wanted to make that book both mathematically and typographically "interesting", since it would be the first major use of Herman Zapf's new typeface, AMS Euler. The font parameters were tuned up to make the text look as good as that produced by the best handwriting of a mathematician. Other design decisions for the book are also described.
<http://www.tug.org/TUGboat/Articles/tb10-1/tb26knut.pdf>
- [93] Donald E. Knuth. "Fonts for digital halftones". In Knuth [89], pp. 415-448. Originally published in *TUGboat* 8(2):135-160, 1987.
This article discusses some experiments in which METAFONT was used to create fonts to generate half-tones on laser printers. The methods also proved useful in several other applications, while their design involved a number of interesting issues.
<http://www.tug.org/TUGboat/Articles/tb08-2/tb18knut.pdf>

- [94] Donald E. Knuth. “Computers and typesetting”. In Knuth [89], pp. 555–562. Originally published in *TUGboat* 7(2):95–98, 1986.
 Remarks presented by Knuth at the Computer Museum, Boston, Massachusetts, on 21 May 1986, at the “coming-out” party to celebrate the completion of \TeX .
<http://www.tug.org/TUGboat/Articles/tb07-2/tb14knut.pdf>
- [95] Donald E. Knuth. “The new versions of \TeX and METAFONT”. In Knuth [89], pp. 563–570. Originally published in *TUGboat* 10(3):325–328, 1989.
 Knuth explains how he was convinced at the TUG Meeting at Stanford in 1989 to make one further set of changes to \TeX and METAFONT to extend these programs to support 8-bit character sets. He goes on to describe the various changes he introduced to implement this feature, as well as a few other improvements.
<http://www.tug.org/TUGboat/Articles/tb10-3/tb25knut.pdf>
- [96] Donald E. Knuth. “The future of \TeX and METAFONT”. In Knuth [89], pp. 571–572. Originally published in *TUGboat* 11(4):489, 1990.
 In this article Knuth announces that his work on \TeX , METAFONT, and Computer Modern has “come to an end” and that he will make further changes only to correct extremely serious bugs.
<http://www.tug.org/TUGboat/Articles/tb11-4/tb30knut.pdf>
- [97] Donald E. Knuth and Pierre MacKay. “Mixing right-to-left texts with left-to-right texts”. In Knuth [89], pp. 157–176. Originally published in *TUGboat* 8(1):14–25, 1987.
 \TeX was initially designed to produce documents with material flowing left-to-right and top-to-bottom. This paper clarifies the issues involved in mixed-direction document production and discusses changes to \TeX that can extend it to become a bidirectional formatting system.
<http://www.tug.org/TUGboat/Articles/tb08-1/tb17knutmix.pdf>
- [98] Donald E. Knuth and Michael F. Plass. “Breaking paragraphs into lines”. In Knuth [89], pp. 67–155.
 This article, originally published in 1981, addresses the problem of dividing the text of a paragraph into lines of approximately equal length. The basic algorithm considers the paragraph as a whole and introduces the (now well-known \TeX) concepts of “boxes”, “glue”, and “penalties” to find optimal breakpoints for the lines. The paper describes the dynamic programming technique used to implement the algorithm.
- [99] Donald E. Knuth and Hermann Zapf. “AMS Euler—A new typeface for mathematics”. In Knuth [89], pp. 339–366.
 The two authors explain, in this article originally published in 1989, how a collaboration between scientists and artists is helping to bring beauty to the pages of mathematical journals and textbooks.

- [137] John Plaice and Yannis Haralambous. “The latest developments in Ω ”. *TUGboat*, 17(2):181–183, 1996.
 The article describes Ω Times and Ω Helvetica, public-domain virtual Times- and Helvetica-like fonts based on real PostScript fonts, called “Glyph Containers”, which will contain all necessary characters for typesetting with high T_EX quality in all languages and systems using the Latin, Greek, Cyrillic, Arabic, Hebrew, and Tinagh alphabets and their derivatives. Other alphabets, such as Coptic, Armenian, and Georgian, will follow, as well as mathematical symbols, dingbats, and other character collections. Ultimately, the Ω font set will contain glyphs for the complete Unicode character set, plus some specific glyphs needed for high-quality typography.

- [152] Joachim Schrod. “An international version of *MakeIndex*”. *Cahiers GUTenberg*, 10-11:81-90, 1991.
 The *MakeIndex* index processor is only really usable for English texts; non-English texts, especially those using non-Latin alphabets, such as Russian, Arabic, or Chinese, prove problematic. In this case the tagging of index entries is often tedious and error prone. In particular, if markup is used within the index key, an explicit sort key must be specified. This article presents a new version of *MakeIndex*, which uses less memory so that it can be used for the creation of very large indices. It allows the automatic creation of sort keys from index keys by user-specified mappings, and supports documents in non-Latin alphabets. <http://www.gutenberg.eu.org/pub/GUTenberg/publicationsPDF/10-schrod.pdf>

- [158] Hán Thé Thành. “Improving TeX’s typeset layout”. *TUGboat*, 19(3):284–288, 1998.

This attempt to improve TeX’s typeset layout is based on the adjustment of interword spacing after the paragraphs have been broken into lines. Instead of changing only the interword spacing to justify text lines, fonts on the line are also slightly expanded to minimize excessive stretching of the interword spaces. This font expansion is implemented using horizontal scaling in PDF. By using such expansion conservatively, and by employing appropriate settings for TeX’s line-breaking and spacing parameters, this method can improve the appearance of TeX’s typeset layout.

- [160] Hán Thé Thành. “Margin kerning and font expansion with pdfTeX”. *TUGboat*, 22(3):146–148, 2001.

“Margin kerning” adjusts the positions of the primary and final glyphs in a line of text to make the margins “look straight”. “Font expansion” uses a slightly wider or narrower variant of a font to make interword spacing more even. These techniques are explained with the help of examples. For a detailed explanation of the concepts, see [159]. This feature was used in the preparation of this book.

- [167] Gabriel Valiente Feruglio. “Modern Catalan typographical conventions”. *TUGboat*, 16(3):329–338, 1995.
 Many languages, such as German, English, and French, have a traditional typography. However, despite the existence of a well-established tradition in scientific writing in Catalan, there are not yet any standards encompassing typographical conventions in this area. This paper proposes typographical rules that reflect the spirit of ancient Catalan scientific writings while conforming to modern typographical conventions. Some of these typographical rules are incorporated in Catalan extensions to TeX and L^AT_EX. The proposal also hopes to contribute to the development of standard rules for scientific writing in Catalan.

- [170] Hugh Williamson. *Methods of Book Design*. Yale University Press, New Haven, London, 3rd edition, 1983.
 A classic work that has become a basic tool for the practicing book designer. It deals with such matters as the preparation of copy, the selection and arrangement of type, the designer’s part in book illustration and jacket design, and the economics of book production. The book also explains the materials and techniques of book production and their effect on the design of books.
- [171] Peter Wilson. *ledmac—A presumptuous attempt to port EDMAC and TABMAC to L^AT_EX*, 2003.
 EDMAC and TABMAC are a set of plain TeX macros for typesetting critical editions in the traditional way. The ledmac package implements the facilities of these macros in L^AT_EX—in particular, marginal line numbering and multiple series of footnotes and endnotes keyed to line numbers. As a new feature the package provides for index entries keyed to both page and line numbers. Multiple series of the familiar numbered footnotes are also available.

Index of Commands and Concepts

This title somewhat hides the fact that everything except the author names is in this one long index. To make it easier to use, the entries are distinguished by their “type” and this is often indicated by one of the the following “type words” at the beginning of the main entry or a sub-entry:

attribute, \LaTeX built-in function, \LaTeX command, \LaTeX entry type, \LaTeX field, \LaTeX style, boolean, counter, document class, env., env. variable, file, file extension, folio style, font, font encoding, function, key, key/option, key value, keyword, length, option, package, page style, program, rigid length, or syntax.

The absence of an explicit “type word” means that the “type” is either a \TeX “command” or simply a “concept”.

Use by, or in connection with, a particular package is indicated by adding the package name (in parentheses) to an entry or sub-entry. There is one “virtual” package name, `tlc`, which indicates commands introduced only for illustrative purposes in this book.

When there are several page numbers listed, **bold** face indicates a page containing important information about an entry, such as a definition or basic usage. A **blue** page number indicates that use of the command or concept is demonstrated in an example on that page.

When looking for the position of an entry in the index, you need to realize that, when they come at the start of a command or file extension, both of the characters `\` and `.` are ignored. All symbols come before all letters and everything that starts with the `@` character will appear immediately before A.
